## Profile & Goals

I studied Computer Science at Telecom SudParis, an engineering university specialised in information systems deployment. I joined Dalet in October 2018 as a Project Engineer and was based at the UK office. I worked on a large Media Asset Management project and several radio projects, in several countries. I also have a strong experience as a Java developer. The diversity of my training and projects I took part in allow me to adapt to any new situation, programming language, concept or technology I will encounter in my career. My goal is to broaden my horizons with technologicaly challenging projects, in multicultural environments.

## Personality

Curious    Autonomous    Serious

Organised    Conscientious    Teamwork

## Professional Skills

Troubleshooting, analysis and problem solving

Oject oriented programming (Java)

Computer security

Python, R

System programming (C, Unix)

Web technologies (Java EE, HTML, CSS, Javascript, )

Databases (SQL, PostgreSQL)

# STUDIES

| 2015-2018 | **Télécom SudParis**<br>IT Engineering school. Specialty in Information Systems |
|---|---|
| 2013-2015 | **Classe Préparatoire PC* Physics-Chemistry**<br>Science courses preparing for competitive exams, Lycée Champollion, Grenoble |
| 2013 | **Baccalauréat S**<br>Mention Très Bien |

# PROFESSIONAL EXPERIENCE

**Since 2018** — **Technical Project Manager at Dalet Digital Media Systems (VIE in Cardiff, UK)**

End to end project deliveries for media companies. Implementation of Media Asset Management, Radio and TV workflows for various clients in Europe (BBC Wales, DPG Media, Prisa Radio) involving :
· Analysis of customer requirements and workflow designs
· Deployment and configuration of Dalet software solutions, on Premise or in the Cloud. Integrations with third party systems· Project Management: planning, scope, milestones tracking, coordination between Customer, Business, IT and R&D

**2017**
**4 months** — **End of Studies Project**
Data analysis for a medical reasearch project in a hospital. R programming.

**2017**
**6 months** — **Java Developer at Klee Conseil & Intégration**
Development of a business-specific application for the French Housing Ministry, using the frameworks Java Struts, Struts 2 and Hibernate. Implementation of SOAP WebServices.

**2016** — **Research Project in computer security**
Study of SCADA transportation systems by simulating manin-the-middle attacks on a SCADA train system made of Lego MindStorm. Implementation of a software solution to the attacks. Attack of Wifi networks through a Wifi Pineapple.

# OTHER EXPERIENCES

**2012, 2013, 2014, 2016, 2018** — **Prapoutel Sports Évasion**
activity leader in a recreational center (Youth Work diploma in 2012)

# LANGUAGES

| Mother tongue | C2<br>Toeic 960<br>fluent | B1<br>intermediate | B2<br>intermediate |
